

Buro Dynamic Intelligence™

buroseating
ergonomics at work®

Intuitive chairs that move the way the body moves.

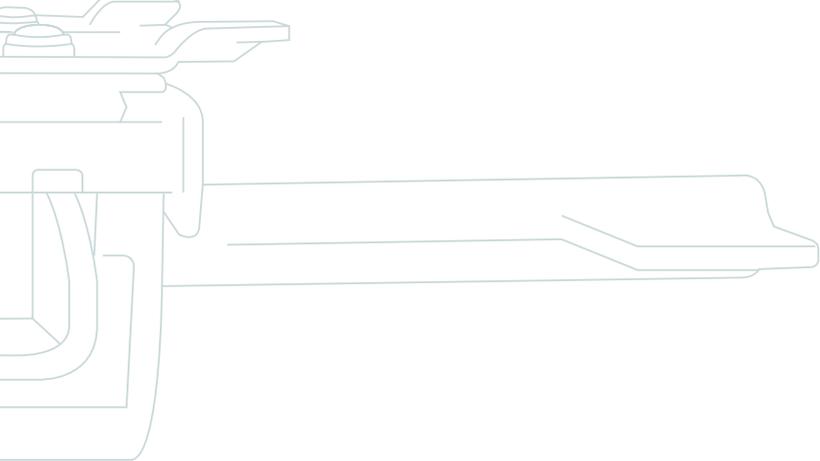

Today we spend more time than ever sitting. We are not designed to sit still, we are designed to be in motion, with fluid movements that stimulates our circulation, our joints and our brain. A badly designed chair will increase fatigue, lead to poor concentration and increase the likelihood of joint strain and muscle fatigue. If it's a habitual problem it can lead to long-term health issues with an inevitable impact on productivity.

The office chair you use occupy should move with you, encourage and support your movement, whilst keeping you comfortable and supported when you are sitting.

This is the philosophy behind **Buro Dynamic Intelligence™**; a concept developed by Andrew Wilson in consultation with Buro. It enables your chair too support natural movement around optimum body postures and self-adjusts for body weight and size.

The self-weighting synchro mechanism featured automatically adjusts to the user's body weight.

Buro's philosophy isn't just about chairs. It's about supporting happy, healthy, productive people.

ANDREW WILSON
OSTEOPATH & ERGONOMIST

Andrew Wilson is an internationally respected adviser and published author on workplace ergonomics. Andrew shares Buro's passion for human wellbeing, design and ergonomic engineering. From concept to design and materials evaluation and ultimately to testing the finished product, Andrew works alongside our designers to ensure our design innovation is driven by the human physiology and biomechanics of a healthy sitting posture.

Buro Dynamic Intelligence™ represents the latest advances in chair design, and the principles behind it govern the design of every Buro chair.

Buro Vela Chair featured in custom upholstery

“Over 80% of office workers complain of ailments that can be directly attributed to bad workplace design – and it doesn’t have to be that way. Buro Dynamic Intelligence™ is featured in our Mentor and Vela chairs where the chair moves just the way the body moves.”

– Andrew Wilson, Osteopath & Ergonomist

Designed to suit you.

People come in all shapes and sizes and have to respond to different tasks and work environments, so it's important that chairs have sufficient range of adjustment.

Featuring the Buro Mentor Chair with nylon base
Options include: Aluminium base | Aluminium base with arms (custom upholstery) | Nylon base with arms

Featuring the Buro Vela High Back Chair with nylon base
Option with headrest (custom upholstery)

Buro Mentor Chair

A very comfortable chair. The ingenious self-weighting synchro mechanism automatically adjusts to the user's body weight, requiring no adjustment of the levers, and encouraging frequent postural variation - which has been shown to reduce fatigue and discomfort. I particularly like the default posture which encourages an open trunk to thigh angle. It is almost impossible to sit in a poor posture! An excellent all-round dynamic chair, that would suit a wide range of users.

Buro Vela Chair

An excellent all-round chair, with no obvious faults that would suit a wide range of users. I particularly like the default posture which encourages a forward thigh tilt posture. The excellent self-weighting tension mechanism encourages the user to use the dynamic features which make a synchro chair so beneficial. The stretch fabric manages to be comfortable and supportive.

Our ergonomic seating is available from Furniture Specialists, Office Furniture, Office Products and Homeware Retailers throughout Australasia. To get in touch, email us at seating@buroseating.com
